

The software is able to control the Sepacore<sup>®</sup> flash X10 and X50 chromatography system. Designed and developed with and for laboratories, the software is intuitive, easy to use and guarantees a safe and reliable operation in any separation step.

## Scope of delivery

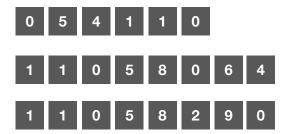

Components	Qty
Control Unit C-620	1
SepacoreControl Software DVD	1
Pressure sensor with mixing chamber	1
Extension cable PS C-601	1
USB cable	1
RS232 cable	1

## System requirements

The PC must fulfill the following requirements:

Operating System	Windows 7 Professional/Ultimate/Enterprise (32-bit, 64-bit), SP1) and Windows 8 Pro (64-bit)
Central Processing Unit	Intel Core i3 or higher, 1.4 GHz or faster
RAM	3 GB RAM or more
Harddisk	>5 GB of free hard disk space
Display resolution	1280 × 1024 (minimum 1024 × 768)
Interface	USB 1.1 or higher
Others	DVD-ROM drive

## Order code

SepacoreControl Package (includes C-620 control unit)

SepacoreControl update set

Upgrade from SepacoreRecord to SepacoreControl

## Dimensions and weight

	Dimensions (W $\times$ H $\times$ D)	Weight
Control Unit C-620	465 × 110 × 118 mm	2.8 kg

# Hardware requirements

Control Unit C-620	
Power consumption	max. 30 W
Connection voltage	$100 - 240 \text{ V} \pm 10 \%$
Fuse	T 8A L 250 V
Frequency	50/60 Hz
Installation category	II
Degree of protection	IP20
Pollution degree	2
Minimum system configuration	1 Pump C-601 or C-605 Fraction collector C-660 Detector (C-640, C-650 or other through Analog input 1V)

Pump Module C-601/5	3.0 and 3.4
Fraction Collector C-660	1.12
UV Monitor C-630	3.1 or higher*
UV Photometer C-635	3.1 or higher*
UV-Vis Detector C-640	2.29

\*Updates are available via the BUCHI Service

### Environmental conditions

Temperature	5 – 40 °C for indoor use only
Altitude	up to 2000 m
Humidity	maximum relative humidity 80 % for temperature up to 31 °C, decreasing linearly to 50 % relative humidty at 40 °C

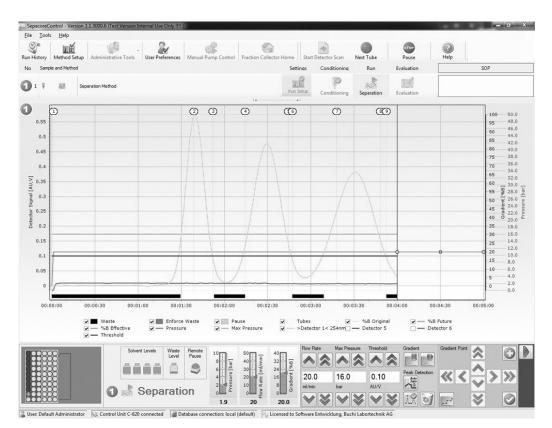

## Languages

SepacoreControl	software

en / de / fr

## Functional principle

All parameters of a chromatographic run will be recorded automatically in a database. Multiple user definable features, such as peak tracking, the ability to combine fractions, add comments and create reports. The SepacoreControl allows the configuration of personal flow charts and report schemes. The SepacoreControl database can be installed at a local PC (standard installation) or at an external server (network installation).

## Main functions

## Multichannel peak detection

Determines the detector or channel used for peak detections. Multiple choices are possible. You can use max. 8 detector channels at the same time for peak detections.

paration Method Setup ave & Close Close Close Close Close	(2) Help		-		-

### Binary gradients / 4 solvents

Using the solvent valve it is possible to select up to two solvents per pump.

Pum	o Module Setup			Solvent Setup		
No	Pump Module Type	Pump Module Serial No		No	Solvent Name	Solvent List
1	C-605 ( 50 bar )	•	Solvent Valve 1 (Pump 1)	Pump 1 / Solvent 1	n-Hexane	6
2	C-605 ( 50 bar )	•	Solvent Valve 2 (Pump 2)	Pump 1 / Solvent 2	1	6
3	none	-		Pump 2 / Solvent 1		6
4	none	•		Pump 2 / Solvent 2		6

#### Change parameters on the fly

Most separation parameters can be adjusted during the run: flow rate, gradient composition, maximum pressure, threshold value for peak detection. It is also possible to deactivate / activate peak detection or to manually switch the fraction collector valve to waste.

#### Manual pump control

The pumps of the Sepacore system can be controlled manually without programming a method. This helps to condition the system before a run e.g. by removing air or for fast solvent exchanges.

Nanual Pump Control		x
Close Stop Pumps Help		
Pressure Limit 5.0 👘 bar		
Actual Pressure 0.0 bar		
Pump 1		
10.0 🚖 ml/min	0.0	ml/min
Pump 2		
10.0 ml/min	0.0	ml/min

### Method management

SepacoreControl allows simple method programming and management. Steps to configure a typical method are:

- $\cdot\,$  Column conditioning
- Separation
- · Column cleaning
- · Purge

The purge step allows an automated solvent exchange within all the tubing e.g. when needed for changes from normal phase to reversed phase runs.

### Run evaluation

SepacoreControl offers multiple user definable features such as peak tracking, the ability to highlight fractions of interest and to add comments. User specific flow charts and records can be exported as PDF files. Color coded tube recognition and tube numbering for quick location of the desired fraction. Zoom in / out as well as taking snapshots to highlight important sections for professional reports.
